Efficient and economical way of packaging

Easy and safe handling / Strong and compact /
Quality and robust design / Quick foil change

AN UNIQUE PACKAGING MACHINE FOR FAST PACKAGING OF SHIPMENTS IN STRETCH FILM

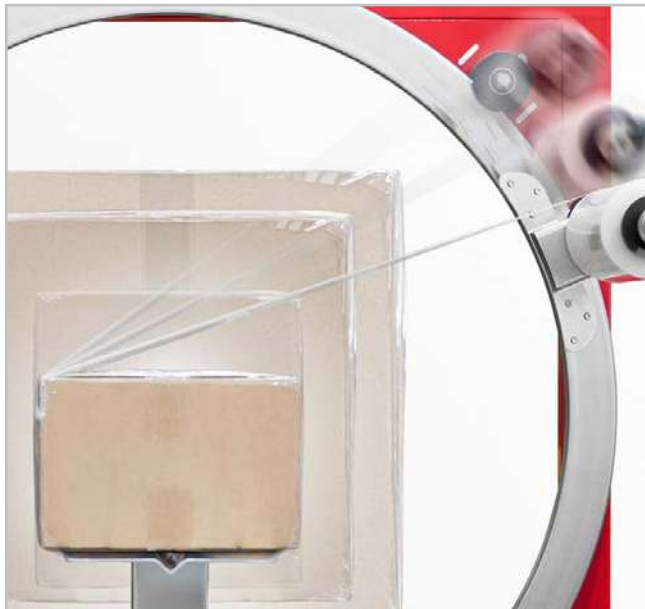

Wrapping Ring H (WR1050H, WR1400H) is a manual wrapping machine for wrapping in stretch film, which ensures the anonymity of packaged goods and protects it from dust and moisture.

With the Wrapping Ring packaging machine (WR1050H, WR1400H), shipments will be faster and more efficient. Stretch wrapping with Wrapping Ring packaging machine (WR1050H, WR1400H) it becomes more economical and aesthetic .

Main benefits

- Height Adjustable Frame
- Height-adjustable work table
- Continuous regulation of film tension
- Durable surface finish
- Easy setup and simple operation
- Optional accessories

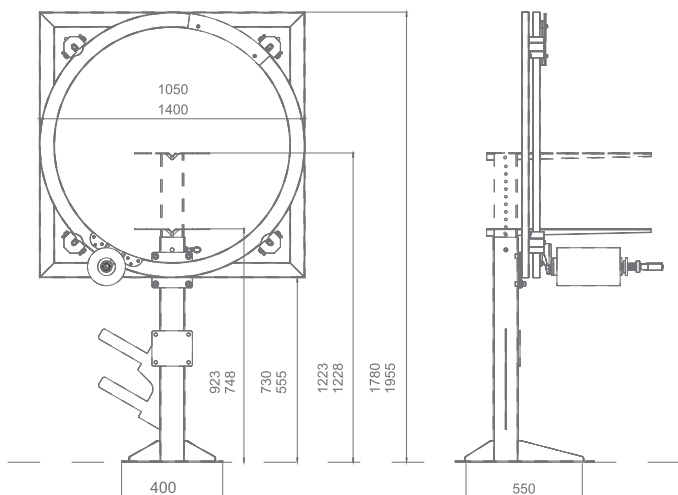

Type of drive	Manual
Max. diagonal of the wrapped item	880 mm (WR1050H) / 1230 mm (WR1400H)
Max. weight of wrapped item	50 kg
Noise	< 70 dB
Power supply	230 V / 50 hz
Power requirement	0.4 kW

WRAPPING RING IS A PURELY SLOVAK PRODUCT!

Wrapping Ring packaging machines are based on our own design and production of these machines.

Thanks to our rich experience in the field of professional packaging technologies, we have been able to create the perfect maintenance-free device with which you will reliably pack shipments for shipment for many years.

AN UNIQUE HELPER FOR PACKING SHIPMENTS IN BLACK OR CLEAR STRETCH FILM

Wrapping Ring H (WR1050H, WR1400H) is a manual wrapping machine for wrapping in stretch film, which ensures the anonymity of packaged goods and protects it from dust and moisture.

With the Wrapping Ring packaging machine (WR1050H, WR1400H), shipments will be faster and more efficient. Stretch wrapping with Wrapping Ring packaging machine (WR1050H, WR1400H) it becomes more economical and aesthetic.

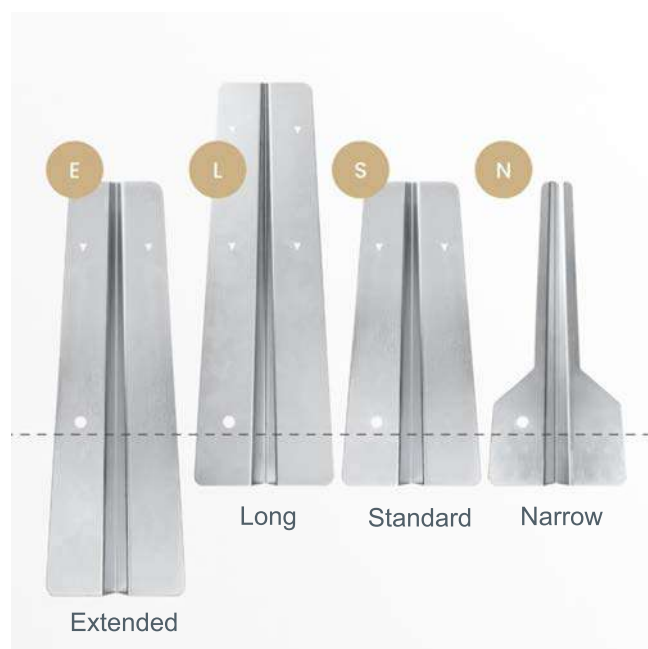

The model line of packaging machines WR1050 (WR1400M) is based on our own design of the entire construction and our own production of these machines.

Thanks to our rich experience in the field of professional packaging technologies, we have been able to create a perfect maintenance-free device in our design office, with which you will reliably pack shipments for dispatch for many years.

Main benefits

- Easy and safe handling
- Motorized wrapping
- Quick foil change
- Continuous regulation of film tension
- Durable surface finish
- Height adjustable frame
- Height-adjustable work table

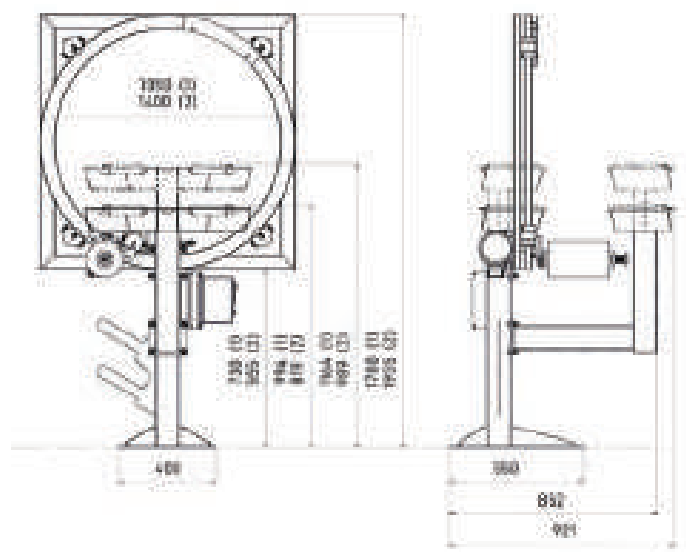

A close-up photograph showing a metal plate being bent over a yellow roller. The roller is positioned between two metal plates, and the top plate is being curved downwards. The background is blurred, showing industrial equipment.

Main benefits

- With the WR1050T (WR1400T) shipments will be faster and more efficient . Stretch film packaging becomes more economical and aesthetic with the WR1050T (WR1400T).

Wrapping tires or other round objects in stretch film becomes more economical and aesthetic with the WR1050T (WR1400T). Thanks to the motorized wrapping, the operator can pack shipments with minimal effort.

Type of drive	Motorized
Stretch film thickness	23 μm
Stretch film width	250 mm
Inner tube diameter	50 mm
Package size	Max. diagonal 880 mm / 250 mm

MOTORIZED WRAPPING MACHINE

Wrapping Ring Cover (WR1050 COVER) is a motorized wrapping machine for wrapping in stretch film, which ensures the anonymity of the packaged goods and protects it from dust and moisture.

Thanks to the closed construction, safety is maximized when using the wrapping machine. Wrapping shipments will be faster and more efficient with the wrapping machine Wrapping Ring Cover (WR1050 COVER). Stretch wrapping with Wrapping Ring Cover (WR1050 COVER) becomes more economical and aesthetic.

Main benefits

- Customizing for the character of packaged shipments
- Continuous regulation of film tension
- Optional accessories
- Possibility to adjust the dimensions of the machine
- Height-adjustable work table
- Easy setup and simple operation

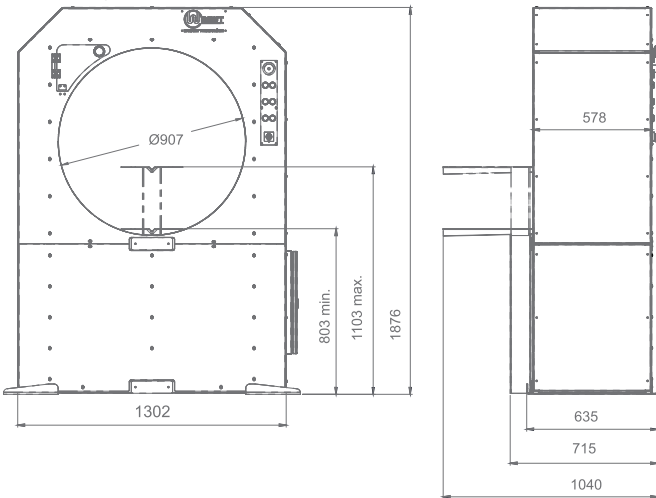

Type of drive	Motorized
Max. diagonal of the packaged item	880 mm
Max. weight of packaged item	50 kg
Noise	< 70 dB
Power supply	230 V / 50 hz
Power requirement	0.7 kW

FAST WRAPPING SHIPMENTS IN STRETCH FILM

Wrapping Ring Cover (WR1050 COVER) is a motorized wrapping machine for wrapping in stretch film, which ensures the anonymity of the packaged goods and protects it from dust and moisture.

Optional accessories for wrapping machines

Easy and safe handling / Strong and compact /
Quality and robust design / Quick foil change

STRETCH FILM, BUBBLE FOIL AND ADHESIVE TAPE DISPENSER

Dispensers for Adhesive Tape, Stretch Foil and Bubble Foil are used for wrapping, sealing and gluing cardboard boxes. They increase the productivity of the packaging and eliminate the waste of used materials.

These accessories can be installed on WR1050H / M / T Packaging Machines and have the following features:

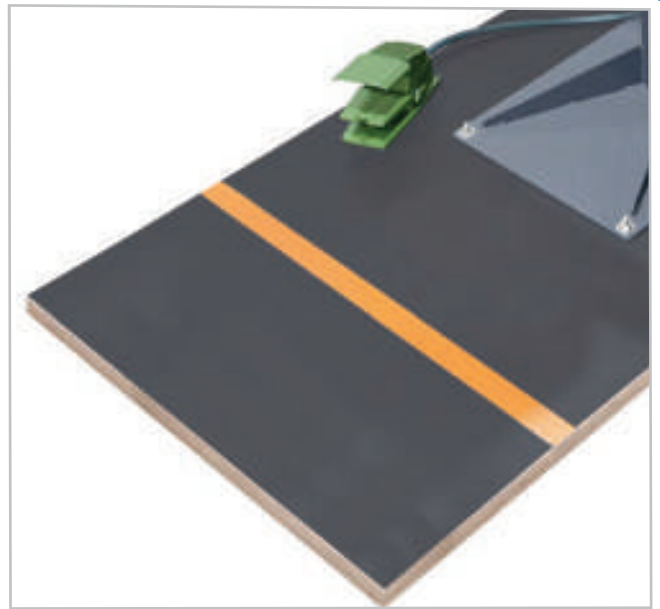

The tape dispenser can be used with tapes that are 48MM, 50MM or 75MM wide.
Stretch film dispensers can be used with stretch film with widths of 125MM or 500MM
Stretch film dispensers can be used with stretch film with widths of 125MM or 500MM

Main benefits

- User friendly
- Being very resistant
- Helps save time and effort
- Made of metal

FIXED AND MOBILE STABILIZERS

Stabilizers are accessories for manual or automatic parcel wrapping machines and they provide stability to the equipment.

The advantage is that the car will not have to be fixed to the floor but at the same time the stability offered remains the same.

Main benefits

- Stability
- Being very resistant

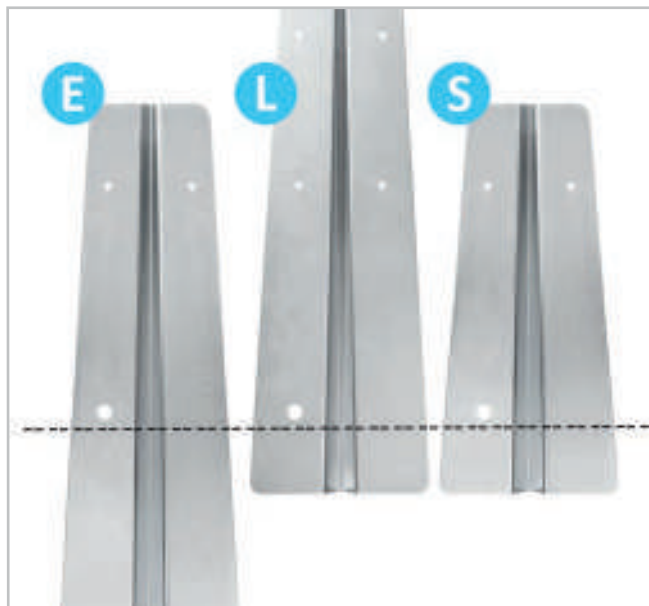

The stabilizers are available in two variants: fixed and mobile.

In the case of the mobile stabilizer, it also comes equipped with rubber wheels to move and use the equipment anywhere in the production, warehouse, etc.

Optional accessories for wrapping machines

Easy and safe handling / Strong and compact /
Quality and robust design / Quick foil change

WORKTOPS

Worktops are accessories that make it easier to pack packages of different sizes. They are present in three variants:

Standard - for small / medium size boxes / packages

Long - for medium / large boxes / packages

Extended - for boxes / packages whose length exceeds 1000MM

Their assembly is simple, they sit down and will be fixed over the standard worktop with which the machine is equipped.

The advantage of these accessories is that they allow the packaging of different types of packages depending on the needs of each.

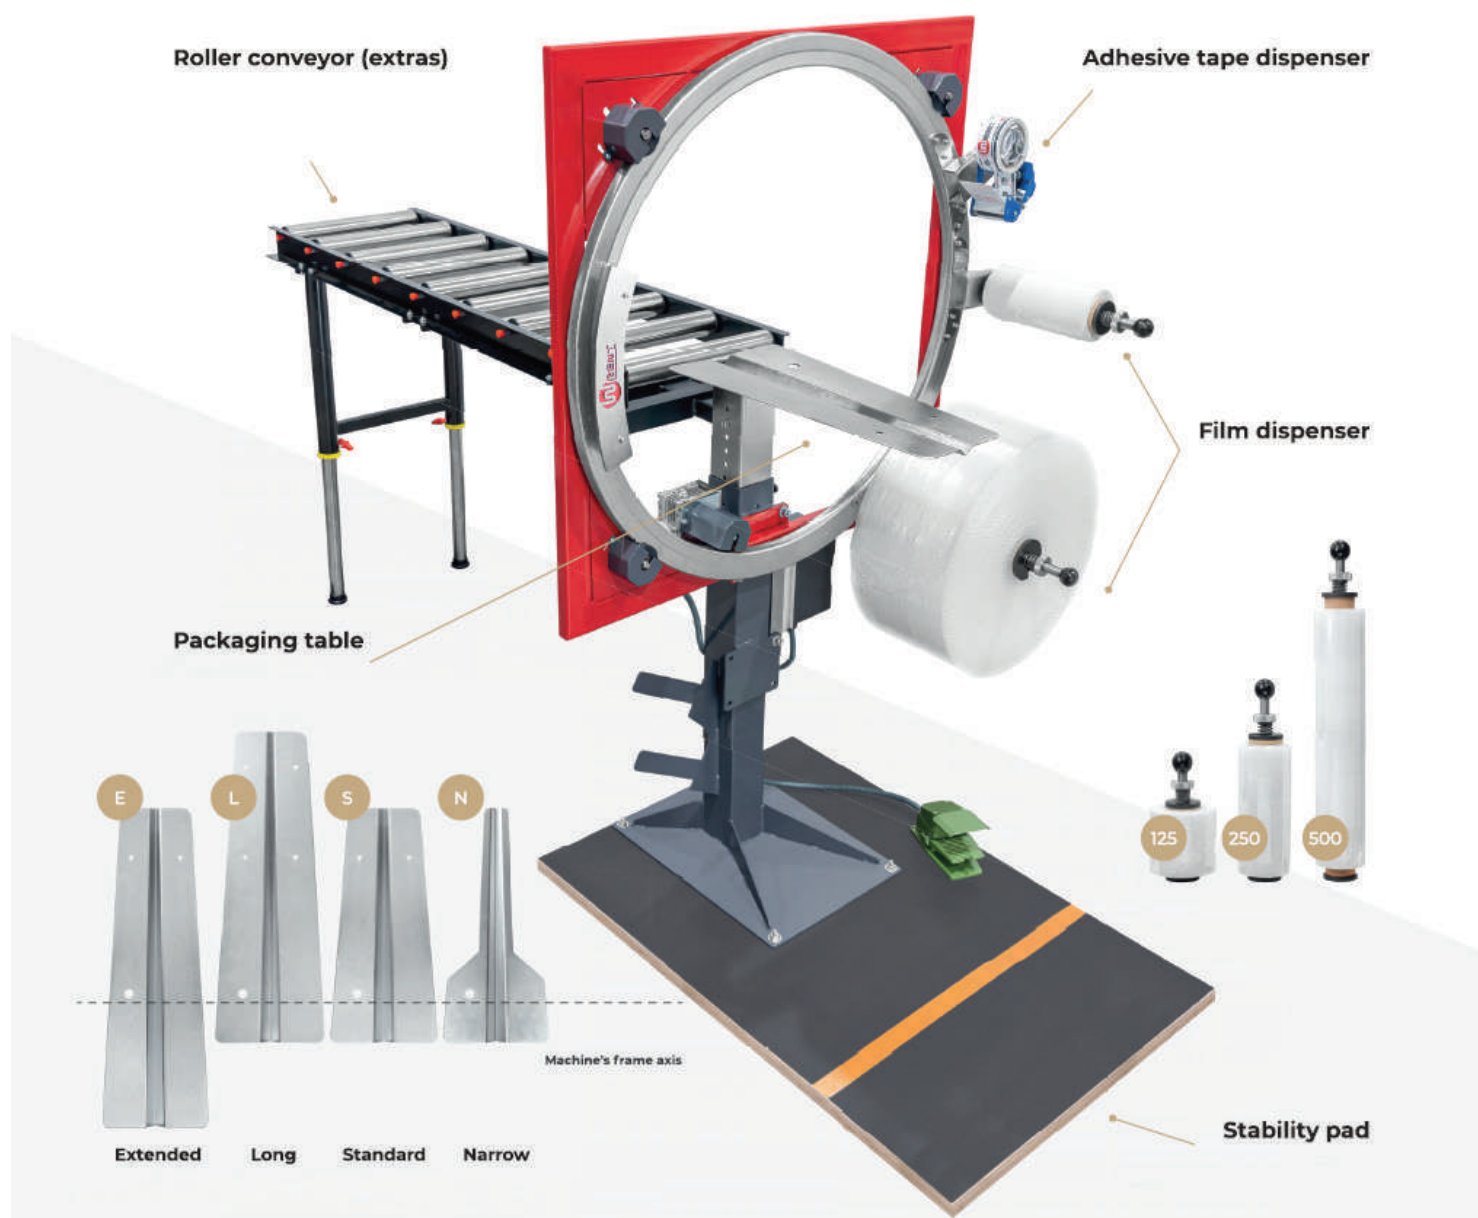

Main benefits

- User friendly
- Being very resistant
- Helps save time and effort
- Made of metal
